

**Pascal FREY**

Institut des Sciences du Calcul et des Données (ISCD) & Laboratoire Jacques Louis Lions (LJLL), UMR 7598

Sorbonne Université, campus Pierre et Marie Curie, 4 place Jussieu, 75005 Paris, France.

phone: (+33)1 44 27 51 02, [email](#), [web page](#)

**1. Degrees and education**

- Habilitation à diriger des recherches, Mathematics, Université Pierre et Marie Curie, Paris, 2002.
- PhD thesis in Computer Science & Applied Mathematics, Université de Strasbourg, 1993.

**2. Academic posts and positions**

- Institut des Sciences du Calcul et des Données, FED 3, Sorbonne Université, director (2010 - ).
- Professor of Mathematics, Sorbonne Université, Paris, since 2003.
- Professor of Mathematics (associate), Universidad de Chile, Santiago, sept. 2007 - dec. 2009.
- Associate Professor of Mathematics, École Centrale de Paris, 2003-2013.
- Senior research scientist, INRIA Rocquencourt, 1996 - 2003.
- Visiting scholar, Rensselaer Polytechnic Institute, Troy, NY, USA, nov. 1993 - dec. 1995.

**3. PhDs. and postdoctorates supervised**

- *PhD Thesis (year of graduation)*  
Frédéric Alauzet (2003), Larvi Debiane (2004), Cécile Dobrzynski (2005), Yann Mauffrey (2008), Gilles Kluth (2008), Thi Thu Cuc Bui (2009), Alexandra Claisse (2009), Maya De Buhan (2010), Charles Dapogny (2013), Nicolas Kowalski (2013), Thi Thanh Mai Ta (2014), Guilhem Lepoultier (2014), Dena Kazerani (2016), Chiara Nardoni (2017), Florian Omnès (2018), Robin Guegen (2018), Serena Costanzo (2021), Elodie Bouzbib (2021), Francesca Basile (2022).
- *Postdoctorates*  
Nicolas Nemitz (2007), Simona B. Savescu (2013), Chantal Oberson-Ausoni (2013-2015), Jérémy Dalphin (2015, 2017), Titien Bartette (2017), Taraneh Sayadi (2017).

**4. Scientific expert positions:**

- Member of the Editorial Board of *Int. Journal for Numerical Methods in Engineering*, *Int. Journal for Numerical Methods in Fluids*, *Computational and Applied Mathematics*,
- Referee for >30 journals in applied mathematics, scientific computing, computer science, computational physics, computational mechanics (CMAME, CMBBE, C.R. Acad. Sciences, Computational Geosciences, Computer Physics Communications, Computers and Fluids, Computers and Structures, Engineering with Computers, Eurographics, ESAIM Proc., Finite Elements in Analysis and Design, IEEE Trans. Visualization and Comp. Graphics, Int. J. Numer. Methods in Engng., Int. J. Numer. Methods in Fluids, Int. J. Numer. Methods in Biomedical Engineering, JCAM, J. Comput. Physics, Journal of Theoretical Biology, JZUS, M2AN, Mathematical and Computer Modelling, Mathematics and Computers in Simulation, SIAM Journal on Scientific Computing, Solid Modelling, Transactions on Graphics, TSI, etc.),
- Member of program committees of several conferences, workshops and summer schools,
- Member of hiring committees (professors, research engineers),
- Member of steering committees (Genci, Carnot Smiles),
- Scientific advisor, CEA-Cesta (2016-2018), Inria team-project Cardamom (2016 - ),
- Member of scientific societies: SMAI (société de mathématiques appliquées et industrielles), SMF (société de mathématiques française), AFM (association française de mécanique),
- Elected member of the "conseil académique" at Sorbonne Université, since 2018,
- Member of the scientific committee "Chaires Blaise Pascal, Région Ile de France, since 2018,
- Member of the committee "Postes d'accueil AP-HP", AP-HP, since 2019,
- Member of the Program Committee, Flagship 3, 4EU+, 2019.

## 5. Grants and awards

- FEDER project **ICS@SU** (fonds européen de développement régional), PI/coordinator, 2015.
- Structuring grant, **ICS@SU**, Idex SUPER, Sorbonne Université, PI/coordinator, 2015.
- Chair **Facile** on facial reconstruction for forensics, Idex SUPER, Sorbonne Université, PI/coordinator, 2014.
- Research grant, labex **CalSimLab** (French Ministry of Research), to sustain research in computational and quantum chemistry and in computational biology, involving nine laboratories at SU, PI/coordinator, 2012-2019.
- Research grant, equipex **equip@meso** (French Ministry of Research), led by GENCI (Grand Equipement National en Calcul Intensif), to reinforce academic computer facilities at the mesoscale level, PI, 2011-2019.
- Research grant **Sesame RefICS** (Region Ile de France), PI/coordinator, , 2011-2017.
- Research grant **FUI Rodin** (Pôles de compétitivité), Recherches en Optimisation topologique et géométrie du Design pour l'INDustrie, PI, 2011-2013.
- Research grant **ANR Vivabrain** (National Reasearch Agency), méthodes numériques pour la simulation d'angiographies virtuelles à partir de modèles vasculaires 3d et 3d+, 2012.
- Research grant **ANR FF2A3** (National Research Agency), ANR-07-CIS7-002-01, FreeFem++ de la dimension deux à la dimension trois, PI, 2007.
- Research grant **STIC AmSud PLOMO** (CNRS), mutual software platform for the elaboration of soft tissue physical models, PI, 2008-2009.
- Research grant **BQR** (UPMC), apports des techniques numériques à la synthèse d'images, 2006.
- European project **MagicFEAT**, méthodes adaptatives pour les semiconducteurs, PI, 2001-2003.
- Research grants Action de Recherche Collaborative (INRIA):
  - LNM: combiner techniques d'adaptation de maillages et méthodes de lignes de niveaux, PI,
  - 3DMeg: méthodes numériques pour signaux MEG, PI,
  - Costic: approximation des courbes et surfaces implicites, PI,
  - VitesV: discrétisation des surfaces et surfaces discrètes, PI.
- Miscellanea: Best Technical Paper Award, 21th Int. Meshing Roundtable (2012), Meshing Maestro, 8th Int. Meshing Roundtable (1999), Young Investigator Award, Hyperthermic Oncology Soc. (1992), Research grant INRIA (1994), Biomedical research grants: Ligue Nationale contre le Cancer (1989-1991) and ARC (1992).

## 6. Research topics and research results

- Research activity  
My research activity encompasses the design and the analysis of mathematical methods involved in numerical simulations based on finite elements or finite volumes methods. Computational fluid mechanics and structural mechanics as well as biomedical engineering are the main areas of application of these methods. Since the last two decades, I have been dealing with mesh generation and adaptation, the analysis of error estimates, the formalization of level-set techniques for interface tracking-capturing purposes and with topological and geometrical shape optimization, as well as surface reconstruction from sampled data.
- Research results  
My research results have been published in journals of theoretical or computational applied mathematics, applied physics, scientific computing, biomedical engineering, computational fluid ou structural mechanics, applied geometry. Most have led to the development of software codes that are distributed under the open access license; some have been integrated into commercial software packages (Fluent, for instance) or open access codes (FreeFem++, Gmsh, [ISCD toolbox](#)).
- I have co-authored 160 papers and research notes in international peer-reviewed journals and 10 books or chapters in monographies. H-index: 32, 4, 442 citations (1, 750 since 2014) ([Google scholar](#))

## 7. Communications and seminars

- Communications at international conferences  
1990, 10th Oncology Forum, Paris  
1991, COMAC-BME Workshop on Hyperthermia Treatment Planning, Lisbon (Portugal)  
1992, 15th International Congress on Clinical Hyperthermia, Lyon  
1992, International Congress on Hyperthermic Oncology, Tucson (USA)  
1993, Computer Assisted Radiology, Berlin (Germany)  
1993, European Conference On Engineering and Medicine, Stuttgart (Germany)  
1994, ICCA meeting, Troy, NY (USA)

1996, International Meshing Roundtable, Pittsburgh, PA (USA)  
 1997, NAFEMS World congress, Stuttgart (Germany)  
 1997, McNU'97, ASME/ASCE/SES Mechanics Conference, Northwestern University, Evanston, IL (USA)  
 1997, International Meshing Roundtable, Park City, UT (USA)  
 1998, Int. Conf. on Numerical Grid Generation in Computational Field Simulations, Greenwich (UK)  
 1998, International Meshing Roundtable, Dearborn, MI (USA)  
 2000, International Meshing Roundtable, New Orleans, LA (USA)  
 2001, Computational Fluid Dynamics, Swansea (UK)  
 2001, MIT Conference, Cambridge, MA (USA)  
 2001, Symposium on Trends in Unstructured Mesh Generation, Dearborn, MI (USA)  
 2002, Curves and Surface fitting, Saint Malo  
 2002, AIAA-2002-0592 Conference, Reno, NE (USA)  
 2002, World Congress on Computational Mechanics, Vienna (Austria)  
 2003, MIT Conference, Cambridge, MA (USA)  
 2003, International Meshing Roundtable, Santa Fe, NM (USA)  
 2003, Int. Conf. on Curves and Surfaces, Saint Malo  
 2004, ECCOMAS, Jyväskylä (Finland)  
 2004, Tetrahedron IV, Verbania (Italy)  
 2005, Pacific RIM Conference, Shanghai (China)  
 2005, International Meshing Roundtable, San Diego, CA (USA)  
 2005, Conference on Finite Elements for Flow Problems, Swansea (UK)  
 2006, Workshop on Computer Assisted Diagnosis and Surgery, Santiago (Chile)  
 2007, Valparaiso Numerico, Valparaiso (Chile)  
 2008, International Meshing Roundtable, Pittsburgh, PA (USA)  
 2010, ICAMI, San Andres Island (Columbia)  
 2011, Acomen, Advanced Computational Methods in Engineering, Liège (Belgium)  
 2012, International Meshing Roundtable, Pittsburgh, PA (USA)  
 2015, Discussion meeting on Maximum Probability Domains, IHP, Paris  
 2016, Analysis, Probability, and their Applications. Qui Nhon (Vietnam)  
 2018, Applied Mathematics, Teheran (Iran)

- Conferences, Workshops and Seminars

1991, Université de Strasbourg  
 1994, Rensselaer Polytechnic Institute (Troy, NY)  
 1995, Inria (Rocquencourt)  
 2000, CIRM (Luminy)  
 2001, ENST (Paris), CIRM (Luminy)  
 2002, CINES (Montpellier), MOX Politecnico di Milano (Italy), Université Paris 6, Inria (Sophia Antipolis), INSA (Lyon),  
 2003, Université Paris 6, Sandia National Laboratory, Livermore, (USA), Inria Sophia Antipolis, Université de Strasbourg  
 2004, Académie des Sciences (Beijing), Université d'Orsay  
 2005, Université de Metz, Sandia National Laboratory, Livermore, (USA)  
 2006, Universidad de Chile, Santiago (Chile), Université Paris 6  
 2007, Collège de France (Paris), Universidad de Chile, Santiago  
 2009, Universidad de Concepcion (Chile), LNCC, Petropolis (Brasil)  
 2010, Université Paris 6, Universidad EAFIT, Medellin (Colombia), Institut Henri Poincaré IHP (Paris)  
 2011, Institut Henri Poincaré IHP (Paris), Université de Franche Comté (Besançon)  
 2013, Université de Picardie Jules Verne (Amiens), Université de Nancy  
 2014, Université Paris 6  
 2015, Lycée Louis Thuillier (Amiens), Cesta-CEA (Bordeaux), Université de Lille  
 2016, Université des Sciences et Technologies, Hanoi (Vietnam), Université Paris Sorbonne (Paris)  
 2017, Res#2, CNAM (Paris), Cesta-CEA (Bordeaux), Transnum (IMI, Paris), Deep Learning et accélération GPU (UPMC, Paris)  
 2019, RMR'19 (Rouen), Paris Healthcare Week (Paris), Journées Française de Radiologie (Paris), Les Rendez-vous de la Recherche AP-HP.SU (Paris).

## 8. List of publications

### 1. Books, chapters in books

- [1] H. Borouchaki, D. Chapelle, P.L. George, P. Laug, and P. Frey. Estimateurs d'erreur géométriques et adaptation de maillage. In P.L. George, editor, *Maillages et Adaptation. Traité Mécanique et Ingénierie des Matériaux, Méthodes Numériques*. Hermès Science, Paris, Oxford, 2001.
- [2] P. Frey. Arbres et mailles. In P.L. George, editor, *Maillage et adaptation. Traité Mécanique et Ingénierie des Matériaux, Méthodes Numériques*. Hermès Science, Paris, Oxford, 2001.
- [3] P. Frey and P.L. George. Mesh generation and related topics. application to finite elements. In F. Dubois, editor, *New Advances in Computational Fluid Dynamics - Theory, Methods and Applications*, pages 1–68. Higher Education Press, 2001.
- [4] P.L. George, H. Borouchaki, P. Frey, P. Laug, and E. Saltel. Mesh generation and mesh adaptivity : theory, techniques. In R. de Borst E. Stein and T.J.R. Hughes, editors, *Encyclopedia of computational mechanics*. Higher Education Press, John Wiley & Sons, 2004.
- [5] P. Frey. A differential geometry approach to mesh generation. In P.G. Ciarlet and T. Li, editors, *Differential Geometry: theory and applications*, volume 9 of *Series in Contemporary Applied Mathematics*. World Scientific, 2008.
- [6] Ch. Oberson Ausoni and P. Frey. *Topological and statistical methods for complex data*, chapter Geometric algebra for vector field analysis and visualization: mathematical settings, overview and applications, pages 183–203. Springer, 2015.
- [7] P. Frey and P.L. George. *Le maillage facile*. Hermès Science, Paris, Oxford, 2003.
- [8] P. Frey and P.L. George. *Maillages : applications aux éléments finis*. Hermès Science, Paris, 1999.
- [9] P. Frey and P.L. George. *Mesh generation. Application to finite elements*. Hermès Science, Paris, Oxford, 2000.
- [10] P. Frey and P.L. George. *Mesh generation. Application to finite elements*. Wiley, 2nd edition, 2008.

The book on mesh generation [10] (850 pages) is usually acknowledged as a reference for mesh generation and mesh adaptation methods in scientific computation.
